

Indarya Green Power unveils ₹4,500 cr investment plan

MUMBAI: Indarya Green Power, India's provider of solutions for the renewable power sector, is planning to commission an integrated renewable energy park in 2000 acre and will house 300 MW solar power generation capacity and 25 MW wind-mill project in the first phase. It is claiming have chalked out an investment plan to the tune of ₹4,500 crore, which includes manufacturing facilities of SPV panels with capacity to produce 500 MW SPV panels per year. This park will also house research and development facility for renewable energy. "Our Global vision is to setup 3000 MW solar in the Asia Pacific Region by 2014 and it would be controlled from Gujarat through remote controlling via satellite technology. It has identified location in Kutch district for proposed project," a statement said.
